

Shifting the Current School Climate

SENSE OF BELONGING AND SOCIAL AND EMOTIONAL LEARNING

Often, conversations about social and emotional learning (SEL) focus on what students bring to the table and how they can increase their SEL skills. However, SEL is just one of many factors that affect students' social, emotional, and academic well-being. When we emphasize only students' capacities and characteristics, we may overlook the equally important influences of school climate; sense of belonging; and adults' attitudes, actions, and behavior.

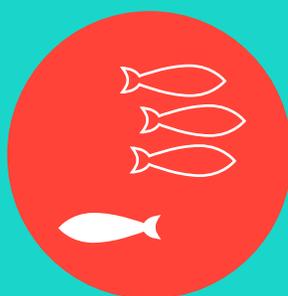

Like the current of a stream, school climate shapes how adults and students engage in the school community. A positive climate in which everyone feels safe, valued, and respected can help increase each student's sense of belonging in school. And when all students feel like they belong, they are more engaged, more motivated, and healthier—and they achieve more.

In addition, because climate permeates everything educators and students do and experience in schools, removing barriers to promote a healthy climate isn't "just one more thing to do" or something that diverts attention from academic development. Rather, intentionally or not, it is the foundation for all school activities.

Students need to know that adults care for them, genuinely believe in their potential, and have their best interests at heart.

Belonging is linked to better academic, psychological, and health outcomes¹

About 25 percent of students are classified as having a low sense of belonging²

Teacher support is one of the strongest predictors of having a sense of belonging in school³

Emotional support from teachers is linked to SEL development in students⁴

LEARNING IS PROFOUNDLY SOCIAL

A positive environment that supports a sense of belonging is key to student success

Hire teachers and administrators who reflect the diversity of your students⁷

CHANGE THE QUESTION

Why do these students have poor social and emotional capacities?

How can we ensure our school climate leads to the healthy development of each student?

SCHOOLWIDE ACTIONS

Take a schoolwide approach to SEL that includes policies and practices that foster positive climate, such as replacing punitive or exclusionary discipline with restorative justice⁹ or positive behavioral interventions and supports¹⁰

Provide educators with training on emotional intelligence, mindfulness, and resilience to stress and trauma⁶

Encourage teachers to engage in perspective-taking to better understand students' experiences and the negative feelings that may lead to misbehavior⁸

Adopt strong anti-bullying policies to promote inclusivity and improve school safety for marginalized students⁵

BELONGING

Have, communicate, and support high expectations for all your students¹²

Use mindfulness practices to reduce your exhaustion and stress¹⁴

Strive to find common ground and similarities with all your students¹³

Use culturally responsive practices to promote a sense of belonging in students from traditionally underserved groups¹⁶

Encourage students to focus on mastery rather than performance goals. Cultivate a classroom in which mistakes are understood to be part of learning, effort is valued, and students learn to appreciate challenges and hard work¹⁵

CLASSROOM-LEVEL ACTIONS

Noticing students who don't seem to feel comfortable in the school? Here are actions you can take.

Structure dynamic group work in which small groups jointly solve a problem in ways that encourage cooperation¹¹
